

Learning about the Constitution of the Republic of South Africa (1996)

The Constitution of South Africa (1996) is the highest law in the country. This law is higher than the President, higher than the courts and higher than the government.

It describes how the people of our country should treat each other, and what their rights and responsibilities are. The constitution of a country is there to protect all of us now, and our children in the future.

Be aware of our past.	**Let us not repeat the mistakes of past.**	**Our Constitution helps us to imagine and build a better future for all.**

We, the people of South Africa;

Recognise the injustices of our past;

Honour those who suffered for justice and freedom in our land;

Respect those who have worked to build and develop our country; and

Believe that South Africa belongs to all who live in it, united in our diversity.

We therefore, through our freely elected representatives, adopt this Constitution as law of the Republic so as to—

Heal the division of the past and establish a society based on democratic values, social justice and fundamental human rights;

Lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law;

Improve the quality of life of all citizens and free the potential of each person; and

Build a united and democratic South Africa able to take its rightful place as a Sovereign state in the family of nations.

Claim your rights as a South African and be responsible to protect the rights of others.	**Know your Bill of rights & Bill of Responsibilities.**

May God protect our people.
Nkosi Sikelel' iAfrika. Morena boloka setjhaba sa heso.
God seën Suid-Afrika. God bless South Africa.
Mudzimu fhatutshedza Afurika. Hosi katekisa Afrika.

Mrs Angie Motshekga, Minister of Basic Education

Dr Reginah Mhaule, Deputy Minister of Basic Education

These workbooks have been developed for the children of South Africa under the leadership of the Minister of Basic Education, Mrs Angie Motshekga, and the Deputy Minister of Basic Education, Dr Reginah Mhaule.

The Rainbow Workbooks form part of the Department of Basic Education's range of interventions aimed at improving the performance of South African learners in the first six grades. As one of the priorities of the Government's Plan of Action, this project has been made possible by the generous funding of the National Treasury. This has enabled the Department to make these workbooks, in all the official languages, available at no cost.

We hope that teachers will find these workbooks useful in their everyday teaching and in ensuring that their learners cover the curriculum. We have taken care to guide the teacher through each of the activities by the inclusion of icons that indicate what it is that the learner should do.

We sincerely hope that children will enjoy working through the book as they grow and learn, and that you, the teacher, will share their pleasure.

We wish you and your learners every success in using these workbooks.

Ways to count. Help us to write it down.

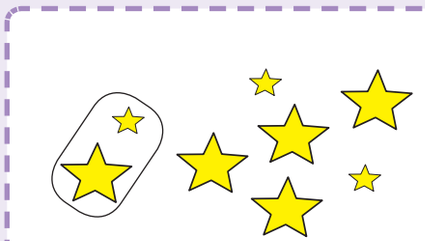

I counted in ones.

1, 2, 3, _____

_____

2, _____

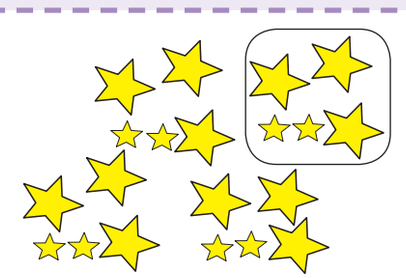

_____

I counted in twos.

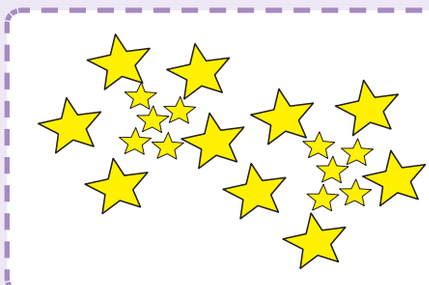

I counted in fives.

5, _____

_____

_____

_____

I counted in tens.

Write number sentences

When you add any two numbers it does not matter what their order is.

Count the total number of big and small stars in the picture on page 2.
Write them in two ways.

Big Small like this

+  = _____

or like this

 +  = _____

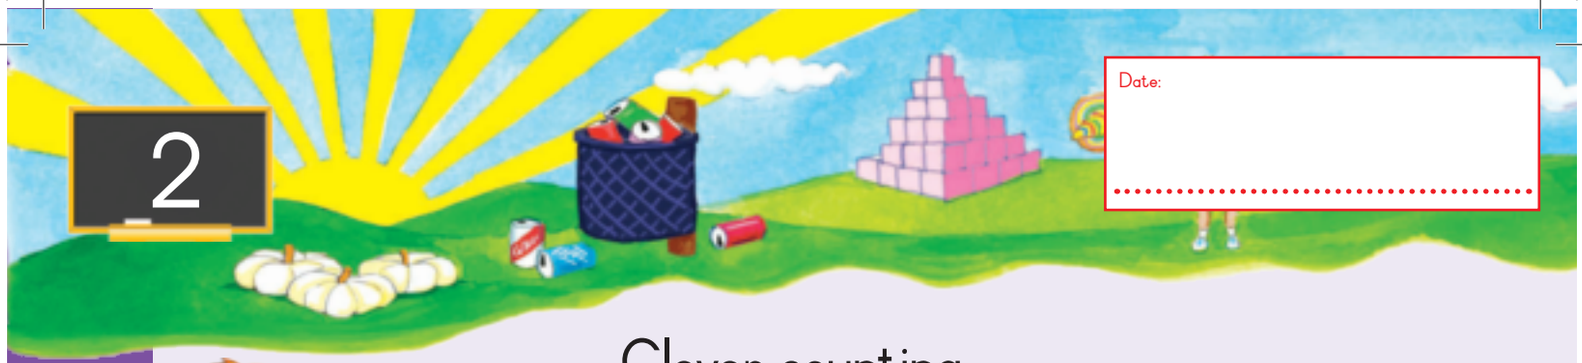

and as a number sentence.

_____ + _____ = _____ *or* _____ + _____ = _____

Clever counting

Counting the pumpkins

Find an easy way to count them.

Answer: _____

Packing the pumpkins

Ten pumpkins go in one bag.

How many bags can you fill with the pumpkins? _____

How many pumpkins are left over? _____

How many more pumpkins are needed to fill one more bag? _____

1 2 3 4 5 6 7 8 9 10

ENG NUM G3 B1 9781431500048.indb 4 2014/04/29 3:50 PM

From + to × (addition to multiplication)

Complete the number sentences.

Example:
10 + 10 + 10 + 10 = 40 ⟹ 4 groups of 10 = 40 ⟹ 4 × 10 = 40

a. 10 + 10 + 10 = _____

_____ groups of 10 = _____ ⟹ _____ × _____ = _____

b. 10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 = _____

_____ groups of 10 = _____ ⟹ _____ × _____ = _____

Hands and fingers

How many hands? _____ How many fingers? _____

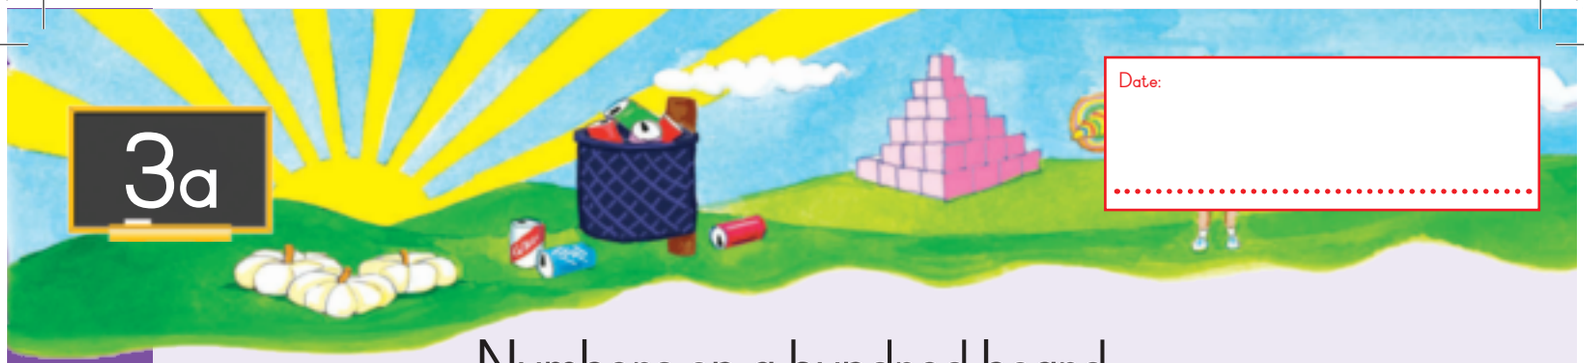

Write your answer in 2 ways.

_____ groups of 10 = _____ and _____ × 10 = _____

Shoes in the class

Read the story.

Thabo: Wow, Miss! Jack is a giant! He wears size 6 shoes!

Mrs Khoza: Well! Yes, Thabo, that is big for a nine year old!
What size shoe do you wear Thabo? What sizes do the rest of the class wear?
Let's do a survey!

The learners call out their sizes, one by one.

Mrs Khoza writes the sizes on the board.

Mrs Khoza: Count, then write how many of each size.

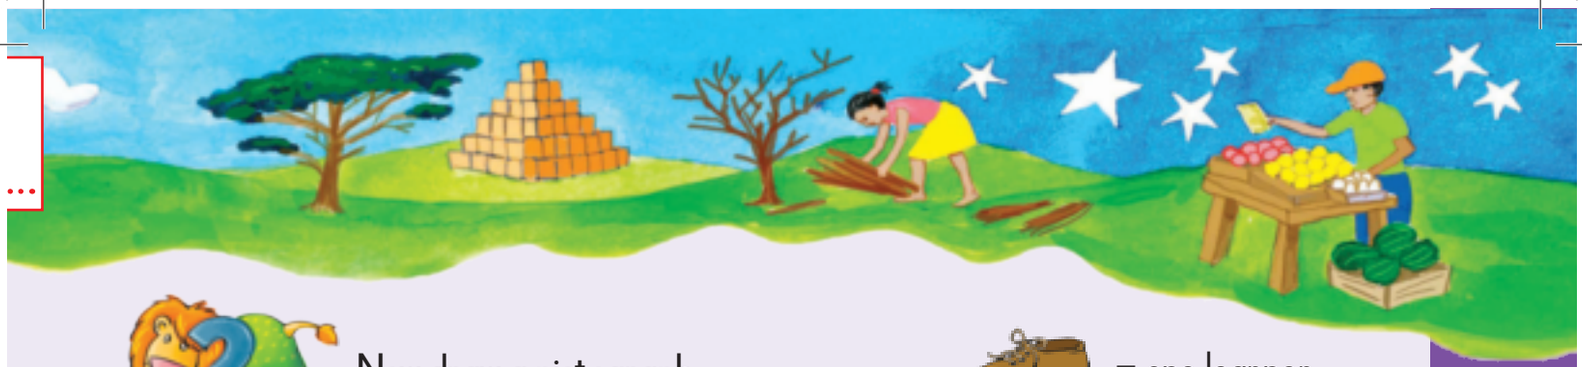

2	2	3	1	2	3	1	4	3	2	3
2	3	2	6	2	2	3	3	3	4	3
4	2	2	3	3	5	3	2	2	2	1
1	1	2	4	2	3	2	3	4	2	4
4	3	2	2	3	1	2	2	1	4	3

Fill in the table below.

Shoe sizes in the class					
Size 1	Size 2	Size 3	Size 4	Size 5	Size 6

1 2 3 4 5 6 7 8 9 10

Putting tens together when we add to 99

Reading

Here is one way to show 22.

Tens	Units
	
1 ten	12 units
1 0	1 0 2

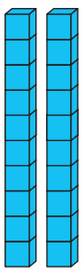

We have one ten

We have twelve units.

We will put 10 of the units in a group.

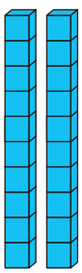

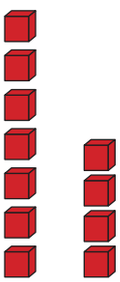

Now we have another way to show 22.

Tens	Units
	
2 tens	2 units
2 2	

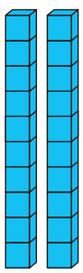

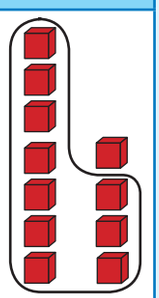

Let's add 27 + 4. The blue blocks are the units we start with and the red units are the units we are adding to them.

27 is 2 tens and 7 units.

Then we add 4 more units.

Tens	Units
	
2 tens	7 units
	+ 4 units
2 0	7 4

We have 2 tens and 11 units.

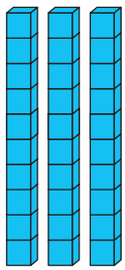

Tens	Units
	

We can show 10 units as 1 ten.

2 0 1 0 1

Now we have

3 tens + 1 unit = 31

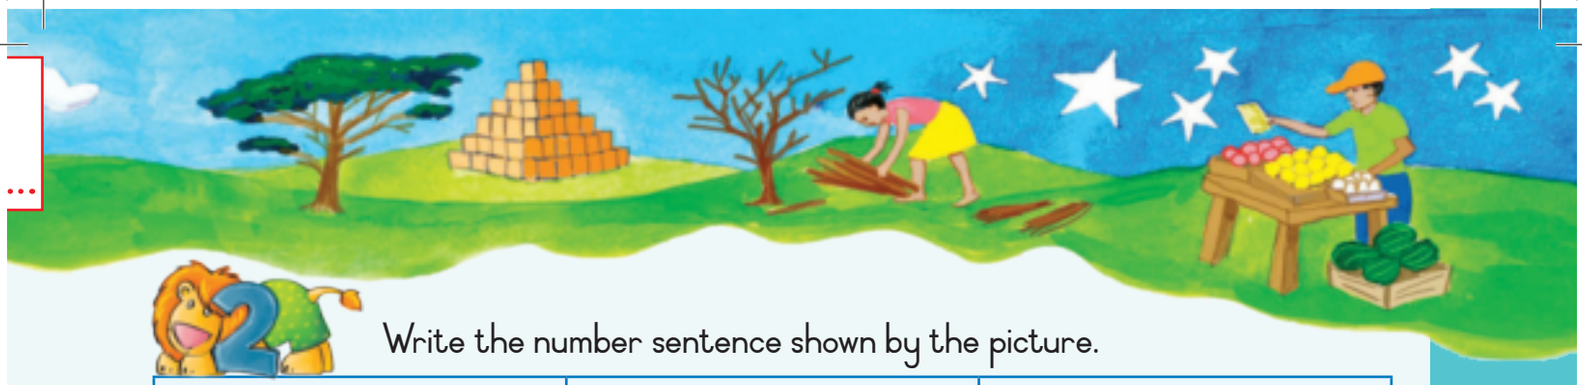

Tens	Units
	

___ + ___ = ___

3 1

1 2 3 4 5 6 7 8 9 10

Term 1

Add on a number line

Sit at your desk!

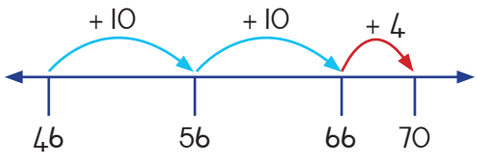

In our school each learner has their own desk.
There are 46 learners in Grade 3A and 24 in Grade 3B.
How many desks do we need for both classes?

Working with a partner

Look at how these three learners used a number line to solve the problem. Complete the sums using the example.

This is what I do: I first add 10. This brings me to 56.
Then I jump another 10 to get to 66.
And lastly, I jump 4 more to land at 70.

I must add 24 to 46.

$= 46 + 10 + 10 + 4$

$= 56 + 10 + 4$

$= 66 + 4$

$= 70$

a. $32 + 25 =$ ☐

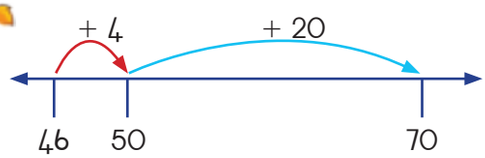

ENG NUM G3 B1 9781431500048.indb 42 2014/04/29 3:51 PM

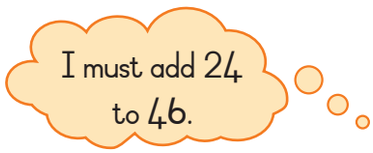

b. $52 + 26 =$ ☐

c. $46 + 25 =$ ☐

This is what I do: First I will jump 4. That will bring me to 50.
I can jump 20 more, which brings me to 70.

$= 40 + 10 + 20$

$= 50 + 20$

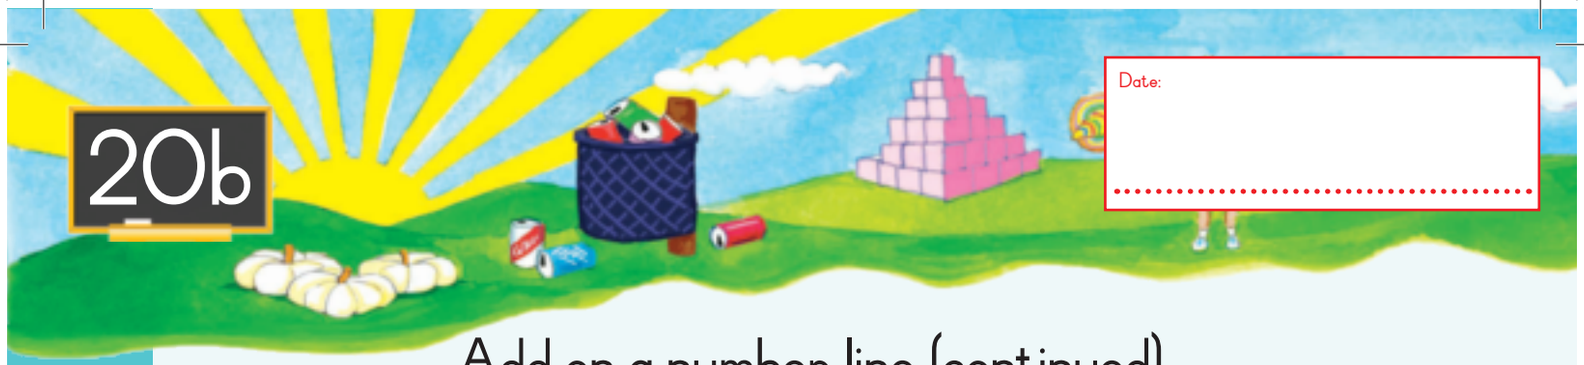

$= 70$

a. $36 + 41 =$ ☐

Teacher:

2.1a

Term 1

Subtract on a number line

One learner! One ruler!

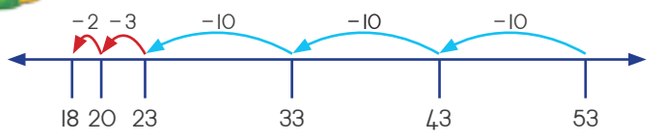

The class needs 53 rulers. We have only 35.

How many more do we need? 53 – 35 = ☐

Working with a partner

Read how the same three learners use a number line here. Complete the sums using the example.

I have to subtract 35 from 53. Subtraction means to take away.

So, I will start at 53 and take away. I'll take away 10, 10, 10 – that brings me to 23. Now to take away five. First I take away 3, and I come to 20. I take away 2 more and I get to 18. So we need 18 rulers.

= 53 – 10 – 10 – 10 – 3 – 2

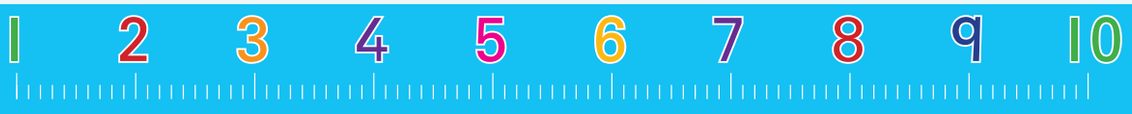

= 43 – 10 – 10 – 3 – 2

= 33 – 10 – 3 – 2

= 23 – 3 – 2

= 20 – 2

= 18

ENG NUM G3 B1 9781431500048.indb 46 2014/04/29 3:51 PM

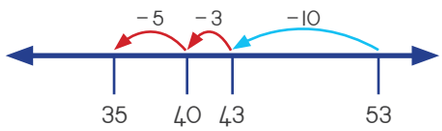

a. $68 - 24 =$ ☐

b. $74 - 38 =$ ☐

c. $92 - 87 =$ ☐

Subtraction means to find the difference between 53 and 35.

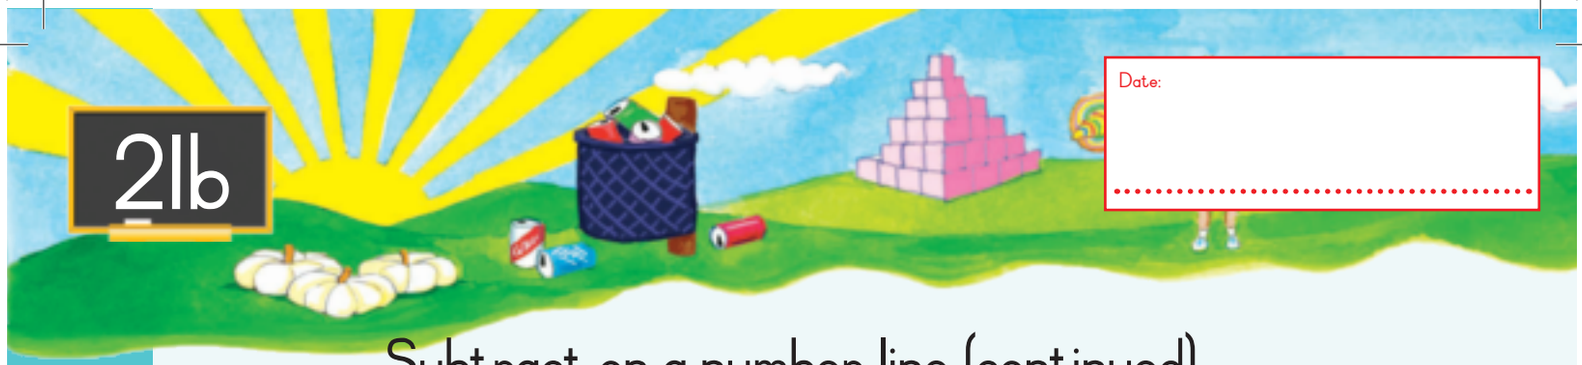

I'll start at 53 and count down to 35 to find the difference. If I count back by 10, I get to 43. I can count back 3 more to get to 40. Then I count down 5 more to get to 35.
10 plus 3 plus five is 18. So we need 18 more rulers.

a. $38 - 14 =$ ☐

Date:

Term 2

Add and combine

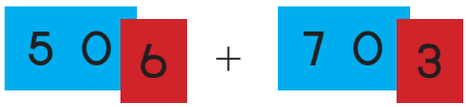

Writing out your sum

Busi can add **units** and **tens** and regroup them. She can add and subtract on paper, without blocks. Sometimes she likes to start with her number cards to show the numbers.

So for the sum 56 + 73, she finds these cards:

She writes it out like this:

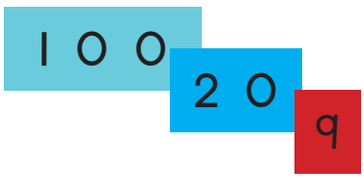

50 + 70 + 6 + 3
= 50 + 70 + 9
= 120 + 9
= 100 + 20 + 9
= 129

She adds the units and puts down the 9 card.

She knows: 50 + 70 = 120.

She takes the **hundreds**, the 20 and the 9 card to make a 3-digit number.

Dumi knows how the blocks work.

She does 56 + 73 like this:

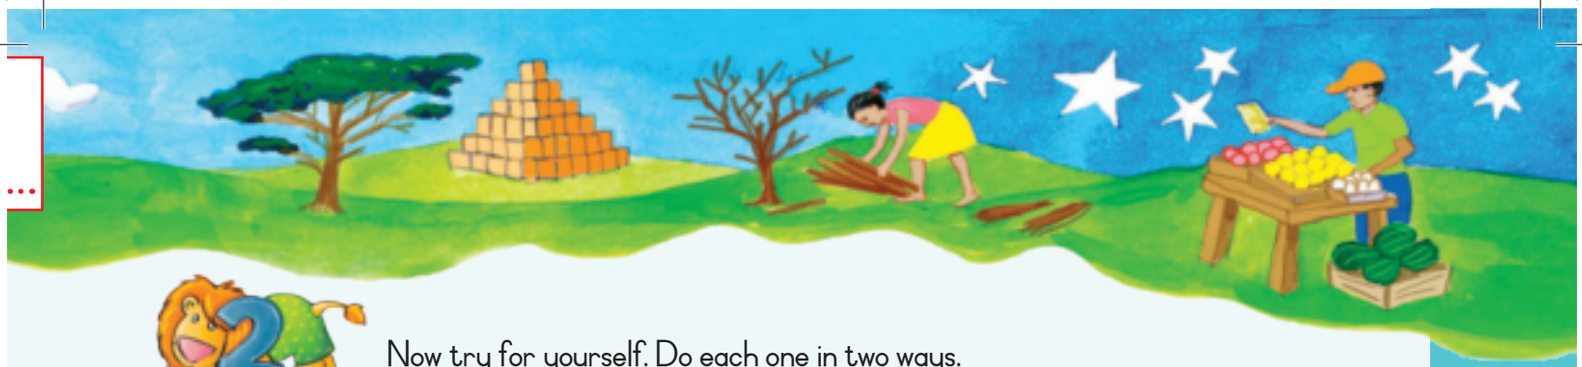

50 + 6 + 70 + 3
120 + 9
= 129

Aakar likes to round off.
Here's how he does this one:

56 + 73
= 50 + 70 + 10 – 1
= 130 – 1 = 129

ENG NUM G3 B1 9781431500048.indb 86 2014/04/29 3:52 PM

Now try for yourself. Do each one in two ways.

a. 86 + 62

Busi's method

80 + 60 + 6 + 2

Dumi's method

80 + 6 + 60 + 2

b. 72 + 63

c. 81 + 57

d. 69 + 71

Use Aakar's method to do this one.

Subtracting back from 220 to 100

Subtract the numbers in the pink box each time.

We have done the first one for you.

220 → −15 → 205 → −5 → ☐ → −10 → ☐ → −20 → ☐ → −20 → ☐ → −5 → ☐ → −5 → ☐ → −10 → ☐ → −15 → ☐ → −10 → ☐ → −5 → 100

Here is a way to check your answers.

Start at 100. Work back to 220.

But this time, add the numbers.

ENG NUM G3 B1 9781431500048.indb 92 2014/04/29 3:52 PM

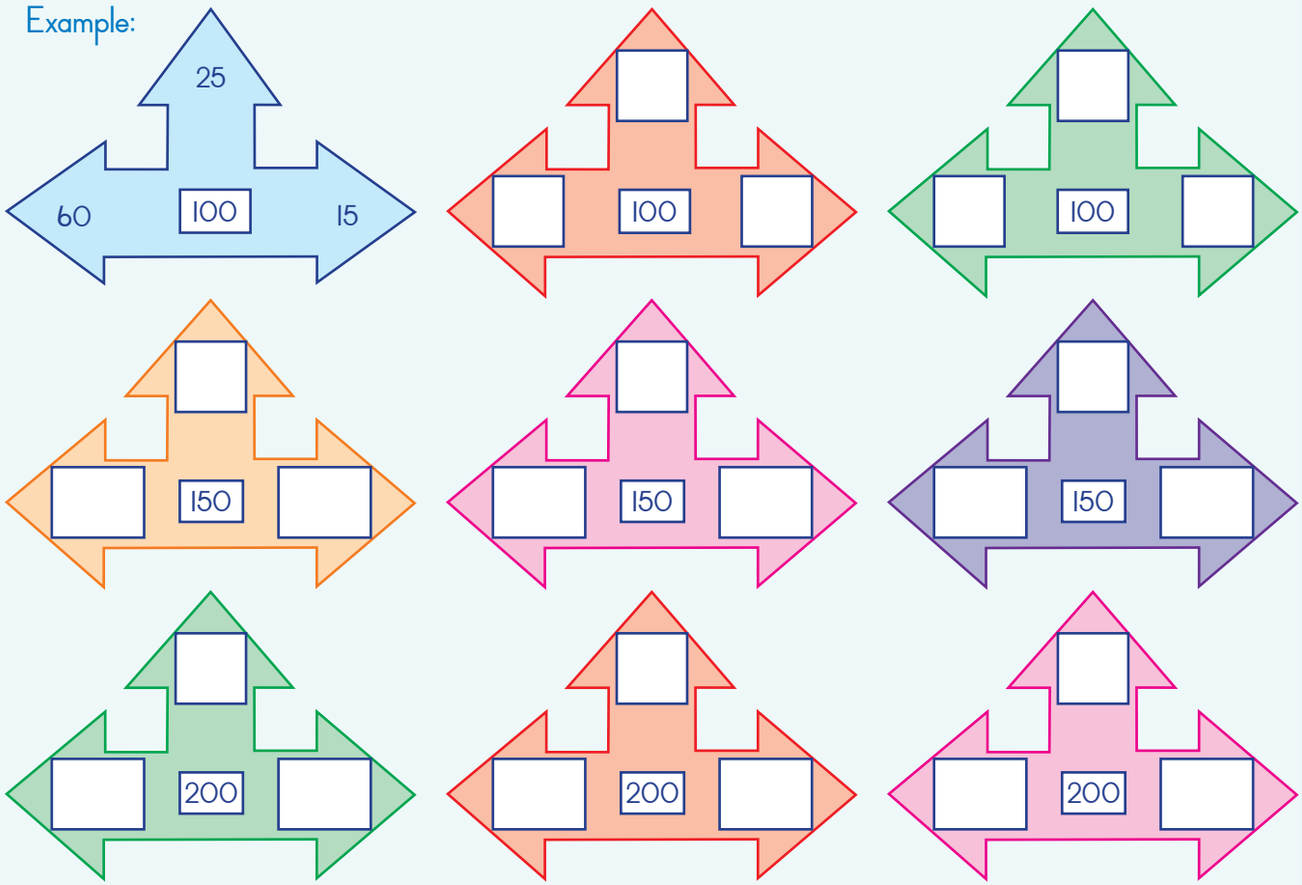

Families of three

Find 3 numbers that add up to the target number.
Rule: Only one number can end in 0.

Example:

50 more and 50 less

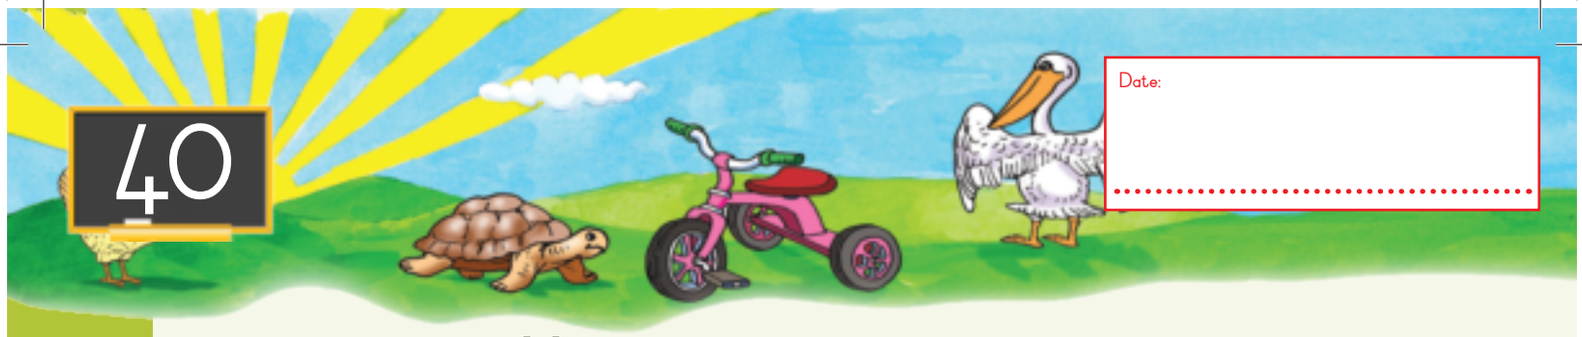

Write the answers in the 2nd row.

+50	70	125	150	81	96	122	134	111	70
	120								
−50	186	200	158	179	139	79	126	138	99

Term 2

Measuring in centimetres

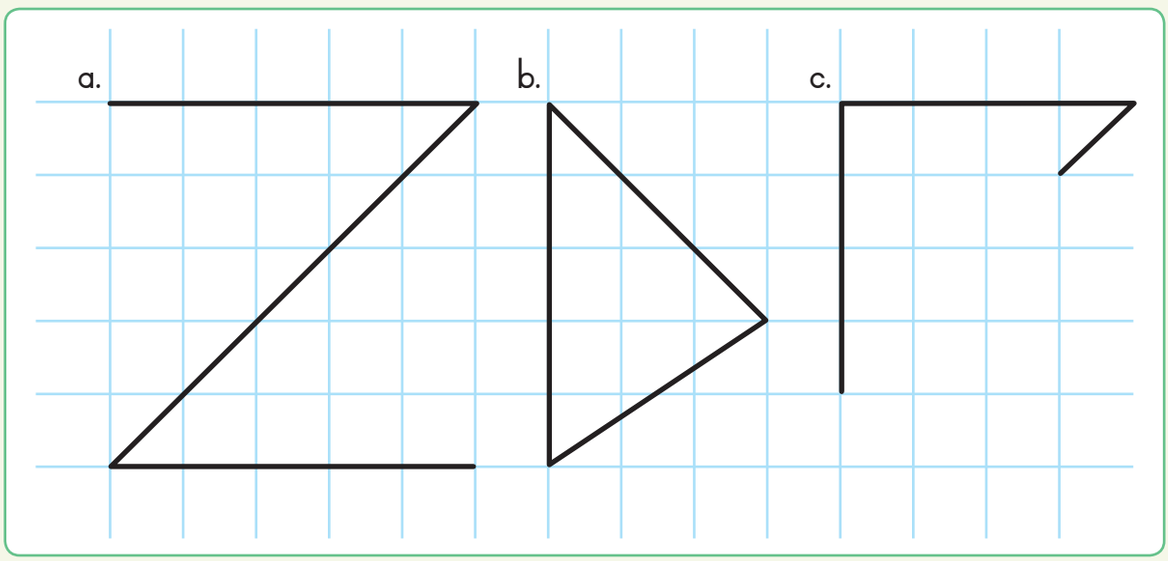

How big is a centimetre?

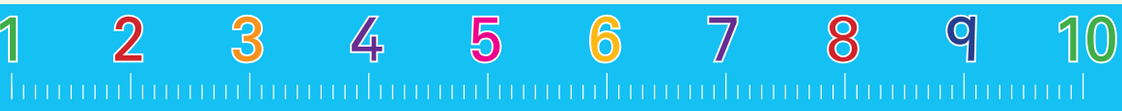

The numbers on the ruler stand for centimetres.
We use the abbreviation or symbol cm.
When you use a ruler, you must start to measure from 0.
Some rulers do not show the 0 like the one on this page.
Find zero cm on the ruler. Write 0 on the ruler.
Where is 10 cm on this ruler? Write 10 there.

Estimate, then measure accurately with your ruler, the length in cm of the line making each shape.

a. Estimate ____ cm	b. Estimate ____ cm	c. Estimate ____ cm
Measure ____ cm	Measure ____ cm	Measure ____ cm

ENG NUM G3 B1 9781431500048.indb 94 2014/04/29 3:52 PM

How long is each line?

How many cm long is each line?

a. ——— ☐ cm	d. | ☐ cm
b. ——————— ☐ cm	e. ☐ cm
c. — ☐ cm	f. ☐ cm

Are you sure?

Which is longer, the red line or the green line?

How can you check?

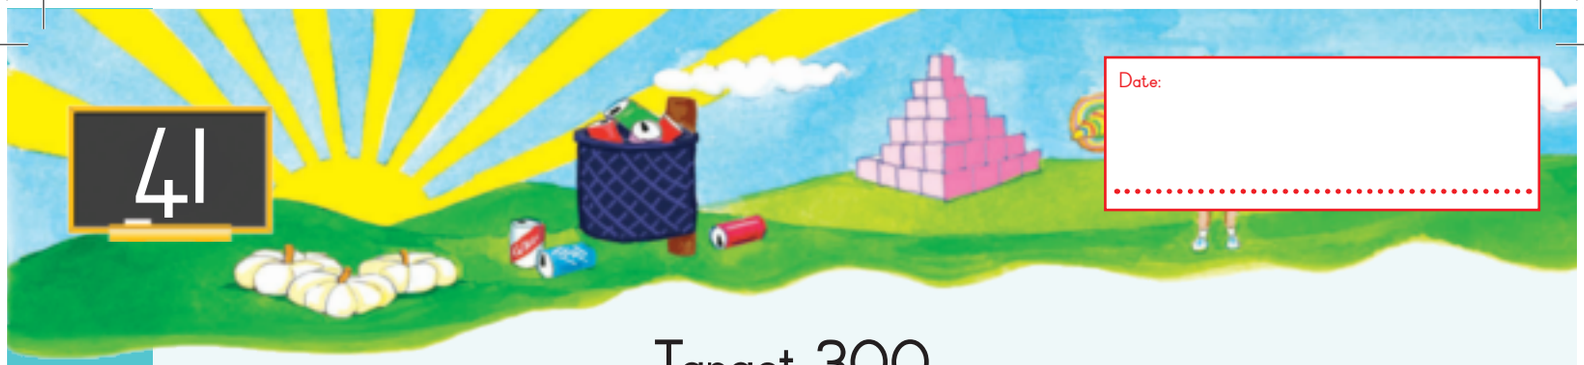

This is what is called an optical illusion.
This happens when your eyes are tricked into seeing something that is not really there.
The two lines are the same length.
The black lines extending outward make the red line look longer and the black lines going inwards make the green line look shorter.

Weighing in

Add some kilograms.

Add and write the answers.

Rounding off and adding!

Think smart!

				
Jackal 25 kg	Tortoise 98 kg	Baboon 59 kg	Baby zebra 88 kg	Pelican 9 kg

Round off the mass of each animal to the nearest 10 kg.

_____

Write the mass of each animal in order from light to heavy.

_____

Estimate the total mass of the 5 animals.

_____

ENG NUM G3 B1 9781431500048.indb 102 2014/04/29 3:52 PM

Combine their mass

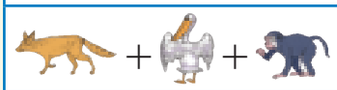

I may not be as heavy as you, old Tortoise,
but I sure am faster!

Steps

- Use your rounded off amounts to estimate.
- Estimate the mass of the animals in each row.
- Calculate the totals using the actual mass.
- Compare the two totals and write the difference.

	I estimate	I calculate	The difference
			
			
			

Vusi's mass

Check. Compare. Correct.

Vusi adds his own mass to the mass of  and  .

Their total mass is 239 kg. How much does Vusi weigh? Show you answer.

What's my weight?

Play in a group. Take turns ...

Add your mass to the mass of some of the animals. Work out the total. Tell the answer to the group. Don't show them your work! They must then try and work out your mass.

Working with time

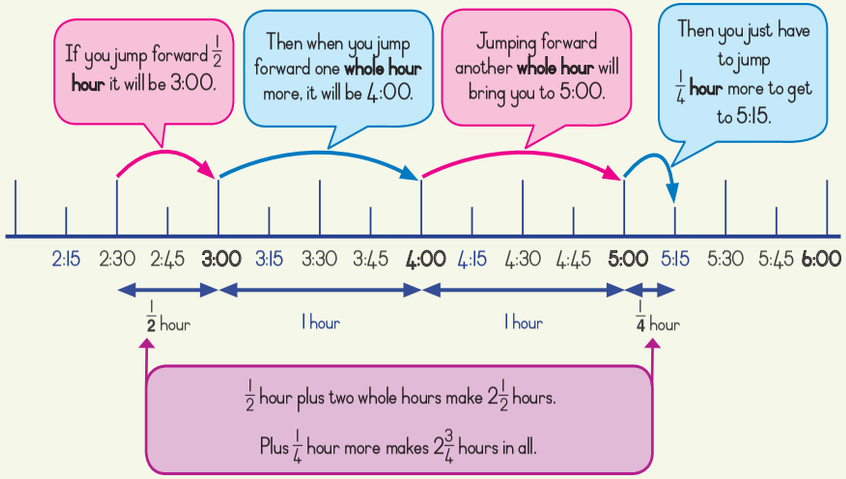

Drawing the times

Half past 5	Quarter to eleven	Quarter past 12	12:45	6:15	4:30

Time problem

Nomsa's mom leaves home at 2:30.
She comes back at 5:15.
How long is she out for?

We can use a time line to work it out.
Put your finger on 2:30,
the time it is now.

Time problems

Check. Compare. Correct.

Solve each problem. Use the time lines to help you.

a. Queenie visits her Dad at the clinic at 15:45.
She leaves at 17:15.
How long does she visit for?

_____

b. Musa goes to the park at 10:45.
He comes home at 12:30.
How long is he away for?

_____

c. Tumi starts to study at 13:15.
She finishes at 14:45.
How long does Tumi study for?

_____

Count in 3s and 4s

Pots with 3 legs

Add and write the answers.

a. How many pots in a row? _____

b. How many legs in a row? _____

c. How many rows of pots? _____

d. How many legs altogether? Show how you work it out.

Tick (✓) which number sentences below show the total.

21 × 7 = ☐ 3 × 7 × 3 = ☐ 3 × 4 × 2 = ☐ 21 × 3 = ☐

How many legs?

Think fast. Think smart.

1 pot	3	legs	10 pots		legs	5 pots		legs
2 pots		legs	15 pots		legs	12 pots		legs
5 pots		legs	13 pots		legs	14 pots		legs

Table legs

a. How many tables in a row? _____

b. How many legs in a row? _____

c. How many rows of tables? _____

d. How many legs altogether? Show how you work it out.

At the factory

A carpenter makes tables. He first makes the legs.

He has made 48 so far. How many tables can he make? ☐

How many more legs does he need for one more table? ☐

Complete the grid by filling in the answers

	2	3	4	5	8	10	11	12
× 3	6							
× 4	8

Count in 50s

One child, one blanket!

How many children? Estimate, then count.

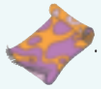

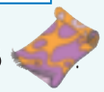

All the children in the picture get a blanket. How many children are there? ____		
Estimate	Count	Compare
How many are ☺ boys? ____ How many are ☺ girls? ____		

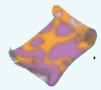

What do they pay?

Gwazi  buys 2  .

She pays R ____

Mrs Chaane  buys 5  .

She pays R ____

Thembi Stores  buy 20  .

They pay R ____

5 	for R50 = R250	10 	for R50 = R500
4 	for R50 = R____	15 	for R50 = R____
3 	for R50 = R____	6 	for R50 = R____
7 	for R50 = R____	12 	for R50 = R____
8 	for R50 = R____	9 	for R50 = R____

How long will it take? Use a calendar.

The grade 3 class collects money to buy 4 blankets.

They collect R5 a day for 5 days a week.

How many weeks do they need to collect money for the blankets?

Fractions: fifths

Divide the cans into the 5 boxes.

- In one fifth of the boxes are 6 cans.
- In two fifths of the boxes are ____ cans.
- In three fifths of the boxes are ____ cans.
- In four fifths of the boxes are ____ cans.
- In five fifths of the boxes are ____ cans.

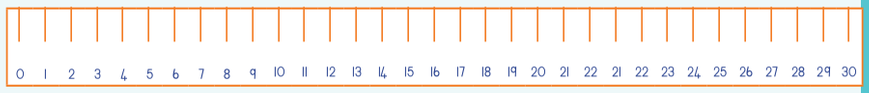

Look at the picture and answer the questions.

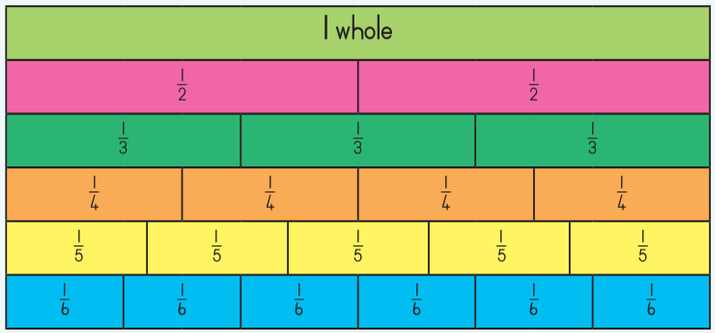

How many chocolates are in the box? ____

- one fifth ($\frac{1}{5}$) of the chocolates equal to ____
- two fifths ($\frac{2}{5}$) of the chocolates equal to ____
- three fifths ($\frac{3}{5}$) of the chocolates equal to ____
- four fifths ($\frac{4}{5}$) of the chocolates equal to ____
- five fifths ($\frac{5}{5}$) of the chocolates equal to ____
- On day I I ate $\frac{1}{5}$ of the chocolates. How many chocolates are left? ____
- On day two I ate another $\frac{1}{5}$. How many chocolates are left? ____

Colour $\frac{1}{5}$ of the measurement of the ruler.

Look at the fraction strips and answer the questions.

Circle bigger or smaller

a. $\frac{1}{2}$ is (bigger)/smaller than $\frac{1}{4}$.

b. $\frac{1}{3}$ is bigger/smaller than $\frac{1}{2}$.

c. $\frac{1}{5}$ is bigger/smaller than $\frac{1}{6}$.

d. $\frac{1}{6}$ is bigger/smaller than $\frac{1}{3}$.

e. $\frac{3}{6}$ is bigger/smaller than $\frac{2}{6}$.

3D objects

Count the boxes (prisms). ☐

Count the balls (spheres). ☐

Count the cylinders. ☐

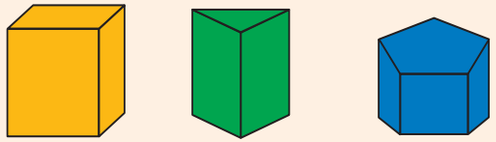

These are all boxes.

Use Cut-out sheets 3 and 4 to make them.

Each flat surface is called a **face**. Stick or draw one smiley on each face of the boxes.

How many faces did you stick on:

cube ☐ prism ☐ prism ☐

Are the faces of the prisms flat or curved? _____

Now make the cylinder from Cut-out sheet 4.

Are the faces of the cylinder flat or curved? _____

Use your objects to build the following.

Describe the position of the cylinder using the words.

On the side | In front | On top

_____ _____ _____

Use the words below to complete the sentences.

The girl looks at the _____ of the building.

The man looks at the _____ of the building.

The bird looks at the _____ of the building.

side | front | top

Double and half

Do you remember?	2 is half of 4	4 is double 2
	20 is half of 40	40 is double 20
	200 is half of 400	400 is double 200

Remember! We can show this in a drawing …

Finding halves

a. 100

b. 200

c. 180

d. 300

e. 150

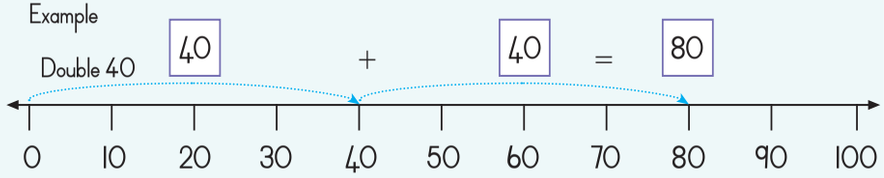

f. 370

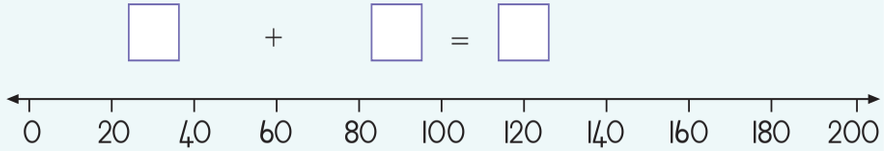

Double the number using a number line. The first example is given to you.

Example

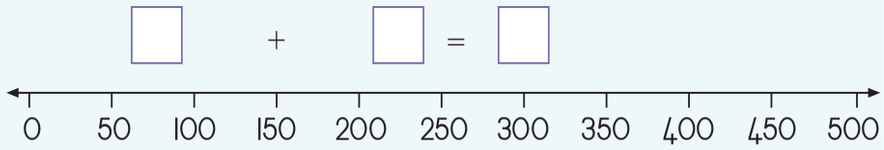

Double 40: 40 + 40 = 80

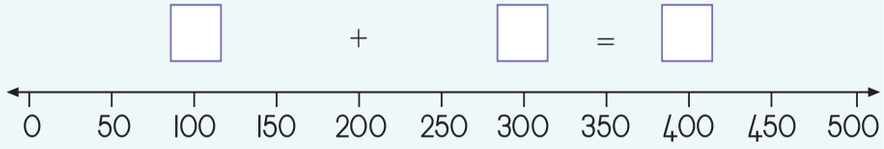

a. Double 60

b. Double 150

c. Double 200

Complete the following

a. Double 100	200
b. Double 150	
c. Double 120	
d. Double 200	
e. Double 170	

Complete the following

a. Half 220	110
b. Half 180	
c. Half 260	
d. Half 60	
e. Half 320

Group and combine

Grouping the children

Mrs Ndaba wants to divide the class into equal-sized groups for outdoor games.
First she puts them into groups of 4.

a. Count the children?

b. How many teams does she make?

Check. Compare. Correct.

c. Show all the other ways they can be grouped into equal sized groups.

How many outfits?

Phindi has 5 coloured shirts and 5 coloured shorts.

How many different outfits can she make using different combinations of the colours?

For example: Blue shirt/blue shorts. Blue shirt/orange shorts.

Write the first letter of each colour. Show all the other possible outfits.

Predict: What if Phindi has 6 different colours of shirts and shorts?

How many outfits can she make?

Check. Compare. Correct.

Maths fun

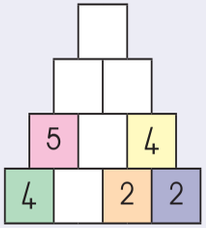

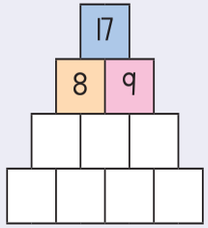

Look for a rule

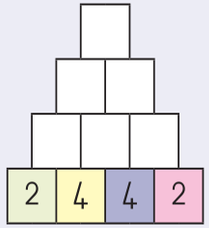

Use the rule to find the missing numbers.

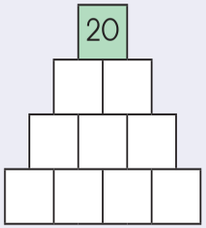

Now do these:

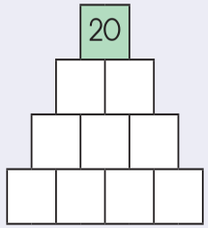

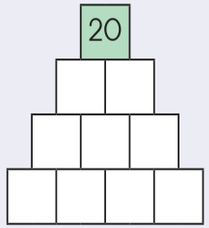

Build to 20 in 3 different ways.

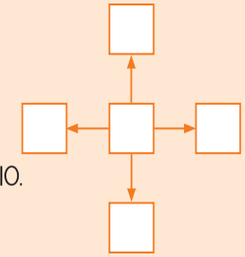

Challenge

Use the numbers 1, 2, 3, 4 and 5.

The 3 numbers in each row must add up to 10.

Rule: Use each number only once.

Finding the numbers

a. Rule: The numbers in each row must add up to 16.

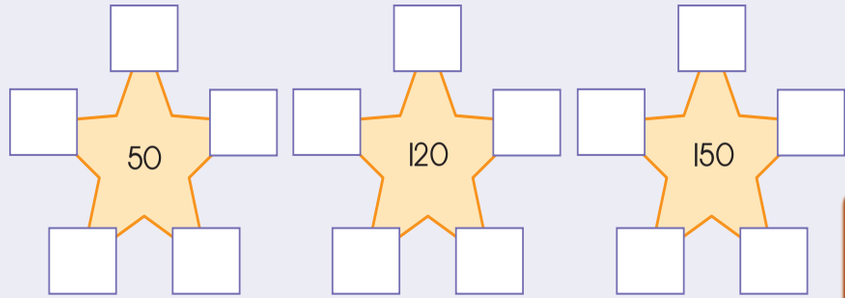

2	5	3	6
			2
		2	

b. Rule: The 3 numbers, across the rows and down the columns, add up to the same total.

2	7	6
9		1
	3	8

23	28	21
12		26
	10	

c. Rule: Write in any 5 numbers that add up to the middle number inside the star.
